SPECIAL LEGISLATIVE

REPORT

PREPARED FOR THE

TILE CONTRACTORS ASSOCIATION OF HAWAII

Now that the 2016 legislature has adjourned we can report to the Association on our activities for the legislative session. This year did not see as many bills as usual and there were not as many bills pertaining to the industry however the few bills that were there, were extremely important.

*The 2016 legislature can be called “lackluster” although, it was fairly active for us. For the two (2) year legislative session there were 3127 Senate bills introduced and 2775 bill introduced in the House. Who cares? Well probably no one except for people like us who had to look at all of them. That is because titles of bills can be deceptive. While a bill entitled “Relating to Contractors” is clearly about us, a bill entitled “Relating to Contracts” might not be about us.*

*The legislature passed a \$13.7 billion budget for the fiscal period July 1, 2016 thru June 30, 2017. That includes things like the use of \$100 million for public school classroom cooling, \$160 million to rebuild the Hawaii State Hospital, \$37.5 million for a new high school in South Maui and \$12 million for a new classroom building at Campbell High School plus, \$35 million for a creative media facility at UH West Oahu and \$35 million for a new Life Sciences Building at UH Manoa.*

## CONSTRUCTION BILLS

S.B. 3126, CD 1 – This is an appropriation bill to provide for air conditioning, heat abatement and other energy efficiency efforts for public schools. The Governor signed off on it within six (6) days after the legislature was over. It authorizes \$100 million dollars from the State General Treasury. Much of the funding comes from federal reimbursements made in connection with Medicaid. *Act 47, May 5, 2016.*

H.B. 2569, CD 1 – This bill requires the Department of Education to set up a goal of becoming net-zero regarding energy use by January 1, 2035. It also requires the Department to expedite the cooling of all public classrooms. *Act 176, June 30, 2016.*

S.B. 2542, CD 1 – Sets up a policy that requires full funding and budget procedures for the routine repair and maintenance of state owned buildings, facilities and improvement. The Governor initially signed his intent to veto this bill but ultimately he let it become law without his signature. *Act 233, July 7, 2016.*

## EMPLOYER/EMPLOYEE LAWS

H.B. 1739, CD 1 – This bill prohibits employers from requesting or forcing employees or potential employees to provide access to their personal social media account. **vetoed**

H.B. 2363, CD 1 – This bill allows an employer to exclude themselves from temporary disability coverage from their own corporation. This bill tracks a change which we pushed for under the unemployment insurance laws because it made sense. This bill perhaps does not. Under unemployment insurance we sought and successfully gained an exemption for owners because the Department of Labor was requiring you to pay in based on your payroll but also said that you could not lose your job through no fault of your own since you were the decision maker. For temporary disability insurance which provides insurance benefits for off the job injuries, this exclusion probably does not make sense because TDI insurance is perhaps one of the cheapest forms of insurance that you can get and it would be difficult to match coverage for the price outside of the work requirement. This bill also provides for electronic reports for workers compensation injuries and increases the penalties for not carrying workers compensation from \$25.00 for each employee for every day of lack of coverage to \$500.00 for every day for every employee. *Act 187, July 1, 2016.*

H.B. 2715, CD 1 – This bill requires the auditor to contract with an actuarial firm to do a closed claim study for workers compensation. Although we don't generally like closed claim studies because they almost always end up in recommendations for improved benefits and/or increased workers compensation premium increases, it is very difficult to argue against the study. *Act 188, July 1, 2016.*

S.B. 2723, CD 1 – This bill amends the penalties for contractors who violate the wage and hour laws. This law was pushed by the Hawaii Construction Alliance with the argument that the violations that they found at Ala Moana Shopping Center justified the increases and the penalties. The original penalties that they advocated were staggering. We and GCA intervened and brought the fines and penalties down to a more reasonable level. As passed, the first violation results in 25% of the amount of back wages or \$250.00 per offense up to \$2500.00 (up from 10%). The second violation, within two (2) years of the first violation results in a penalty of \$500.00 for each offense up to \$5000.00 and a third violation within three (3) years of the second violation results in a

penalty equal to two (2) times the amount of back wages or \$1000.00 for each offense up to \$10,000.00, whichever is greater and suspension from doing any new work on public works project for a period of three (3) years. *Act 192, July 1, 2016.*

## **TRANSPORTATION**

S.B. 2618, CD 1 – This bill requires the Department of Transportation to do a feasibility study on the establishment of an inter-island and intra-island ferry system and it makes an appropriation to do the study. *Act 196, July 1, 2016.*

## **ENVIRONMENTAL ISSUES**

H.B. 2626 – This bill prohibits the Department of Health from issuing a permit for a new underground fuel storage tank within one hundred (100) yards of a shoreline. It allows DOH to issue a permit to repair or replace existing underground fuel storage tanks and allows permit holders within one hundred (100) yards of the shoreline to renew their permits but prohibits operation and renewal of a permit for a underground fuel storage tank within one hundred (100) yards of the shoreline beginning January 1, 2045. *Act 179, July 1, 2016.*

## **DEAD BILLS**

As usual, bills that died are oftentimes more important and far more work than bills that passed. In fact, if it's a "negative" dead bill, it means we successfully did our job. In the 2016 legislative session, GCA took the lead in attempting to work out a solution to problems that they see with the Subcontractor Listing Law. Unfortunately, as often happens in the legislative process, what is introduced as an innocent, pure solution gets twisted and turned into a negative proposal that causes problem after problem.

The first proposal offered by GCA was one which have allowed the general contractor to make changes in the subcontractor listing up to two (2) days after the bid filing. After a lengthy public hearing Senator Donna Mercado Kim's committee decided to change that to two (2) days prior to the bid opening. Fortunately for us and, based on our lobbying, as well as a variety of other groups, this bill died in the Senate Ways and Means Committee.

Another approach by GCA was an attempt to straighten out the bid listing when the sub that was listed was an entity who either had 1) lost their insurance, 2) lost their RME or 3) had some defective license status, but in any case was a situation where it presumably could be remedied prior to the contract award. GCA wanted the freedom to be able to go ahead and list that technically unlicensed subcontractor anyway and get it straightened out at a later date. Although skeptical, we attempted to work with the generals in resolving this problem right up until the last minute.

We withdrew our support and turned it into active “kill mode” when RICO announced that if an unlicensed sub was listed they could quite possibly go after not only that sub for unlicensed activity but might also go after the general for aiding and abetting. In other words, for the subcontractor it would be “congratulations you won the job” and “congratulations you’re busted”. RICO felt they were somewhat in a bind inasmuch as they had fined Ansaldo \$150,000.00 for filing a bid on the HART project without a license for acting as a contractor (their application was in process but had not yet been granted). Based on that finding, we immediately withdrew our support and along with the State Procurement Office opposed the bill. The bill died in the House Finance Committee thanks to Chair Sylvia Luke.

This by no means solves the problem and we think it will continue to be important for general contractors and subcontractors to perform due diligence on each and every one of their subcontractors prior to listing them if they value their bids and want them to be considered.

That likely also means that we will start over on this issue in 2017.
